Learn more about **CliniCells™**

Addressing an Emerging Global Market: **CliniCells™ Clinical Grade Fresh Whole Bone Marrow or Leuko Paks**

We have served a growing need for cell therapy companies by providing a reliable source of starting tissue for allogeneic studies since launching at ISCT 2016. To date AllCells **CliniCells™** have been commercialized in multiple regions including US, Japan, and EU. By leveraging our existing commercial infrastructure for donor procurement, including our FDA-registered tissue collection facility, customers can significantly accelerate timelines and lower costs. **CliniCells™** represents a **time-saving, customizable, and compliant solution for quality source material.**

Successful Audit Milestones Passed

AllCells has passed audits with several customers in multiple regions. Learn more by engaging with our staff: clinical.allcells.com

Growing Our Team and Our Expertise

We have augmented our internal expertise with the hiring of a cell therapy expert as our *VP of Science and Technology*, **Timothy C. Fong, PhD** (20+ years of experience in gene & cell therapy including GMP manufacturing).
